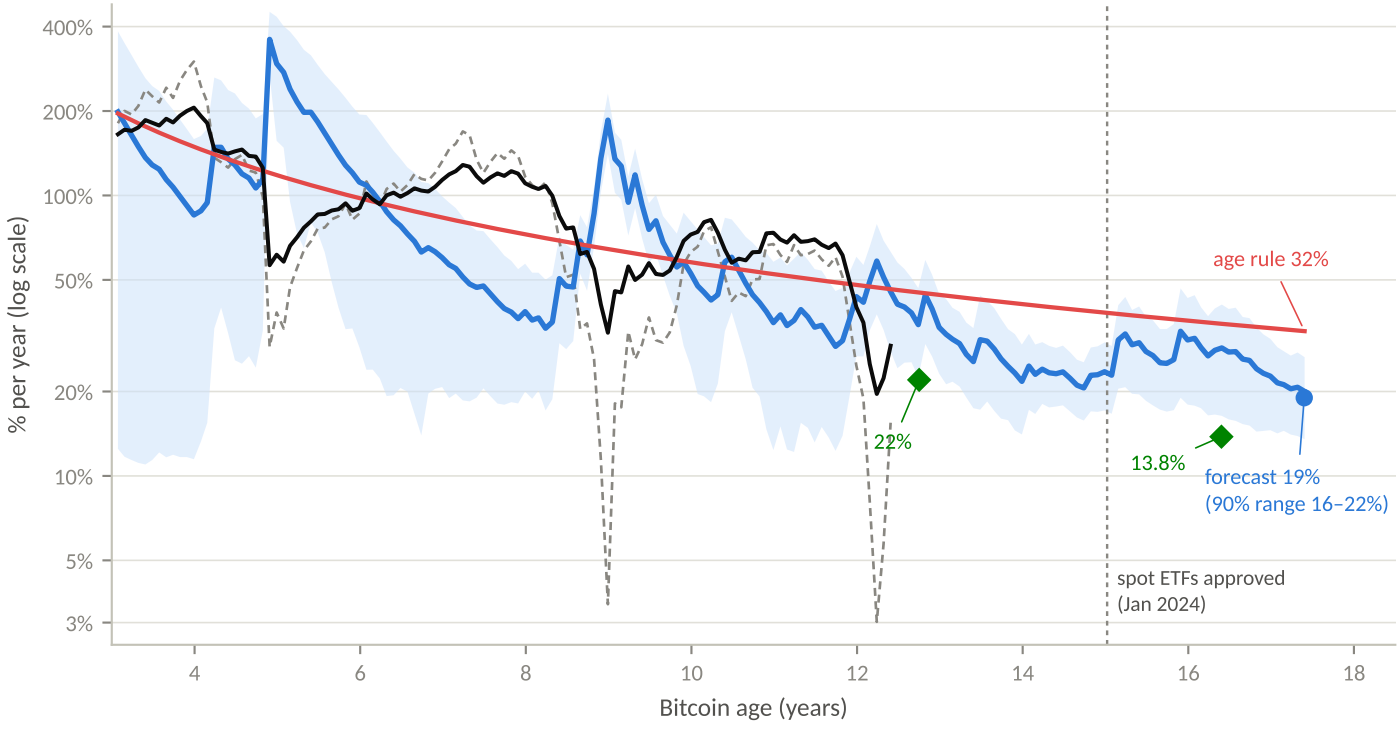
Required return and realized average return, 2012–2026

monthly series from age 3 (January 2012); logarithmic vertical scale, so equal distances are equal ratios



realized average return over the next 5 years (arithmetic drift: same units as the required return)

realized compound return over the next 5 years (CAGR, for reference)

required return of the marginal holder (midpoint of the band)

required-return band: holder condition (γ 1.7–2.8) up to the option-implied all-in bound

age rule forecast

holders' surveyed expectations (2021, 2025)
